DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
2. Regarding claim 11, the phrase " like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by " like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Vaghefi 5875776.
5. Vaghefi teaches use and an inhalable medicament formed by a combination of at least one gas in combination with at least one active product for manufacturing an inhalable medicament or part of an inhalable medicament intended for the treatment or prevention of pain in humans or animals, in which the active product is chosen from among analgesics, in which the active product is chosen from among compounds with an anti-inflammatory action (ibuprofen), in which the active product is chosen from among antipyretics (col. 10, lines 63-67 and col. 11, lines 1-11), in which the gas is

chosen from among helium, oxygen, nitrogen, xenon, hydrogen, carbon monoxide, carbon dioxide argon, krypton, nitrogen monoxide, nitrogen protoxide, carbonated hydrocarbons, fluorocarbons, and mixtures of several of these gases (col. 4, lines 59-65), in which the inhalable medicament is in the form of an aerosol comprising the gas and the active product in the form of a power, liquid or a powder/liquid mixture (col. 3, lines 43-53), it would be inherent that the inhalable medicament contains a therapeutically effective quantity of active product and the active product leads to a synergistic effect.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Vaghefi in view of Pritchard 5048729.

8. As to claim 15, Vaghefi teaches the device the aerosol according to claim 12. It should be noted that Vaghefi fails to teach a reservoir equipped with a reservoir opening, a membrane comprising a membrane opening, and a valve rod.

Pritchard teaches a apparatus with common reservoir equipped with a reservoir opening, a membrane comprising a membrane opening, and a valve rod for use in an inhaler. Therefore it would have been obvious to one of ordinary skill in the art to use the reservoir equipped with a reservoir opening, a membrane comprising a membrane

opening, and a valve rod of Pritchard dispensing a metered dose of an active therapeutic agent in a liquid (col. 1, lines 57-58).
